"EGEO" GYPSUM AND INVESTMENT VIBRATOR USER'S MANUAL

Note:
Before unpacking the "Egeo Gypsum and Investment Vibrator", make sure the box has not been damaged or knocked during transportation.

Read carefully the instructions before operation.

Do not change either the wire or the plug. Do not employ any adapters which might obstruct the earth connection.

Instructions:

1. After unpacking, place the machine on a smooth and hard surface. Remove the bar on the motor.
2. Plug the device in a 220-volt. socket.
3. Turn the switch knob to the right up to the first point in order to get a soft vibration; up to the second point, to get a medium vibration; and up to the third point in order to get an intense vibration.
4. To turn off the machine, simply turn the knob completely to the right.
5. The plate surface is covered with a rubber to prevent noises, which is easily removable for cleaning.
